* IOTF estimate

** Weighted for non response (not comparable with 2006 unweighted figures – unweighted figures in 2006 were 43.4% men overweight with a further 23.7% obese, 31.9% overweight women & further 24.4 % obese)

Last Updated 1st October 2009

With the limited data available, prevalence's are not age standardised. Prevalence's are based on the best available data for the country, in some circumstances the data may be based on sub national surveys. Self reported surveys may underestimate true prevalence. Sources and references are available from IASO. © International Association for the Study of Obesity, London – October 2009
